WHITE SUFFOLK RAMS

SOUTHDOWN X WHITE SUFFOLK RAMS

POLL DORSET RAMS

Our Annual Spring Ram Sale will be on Wednesday 6th October 2021 on property at Kismet Howlong NSW with inspections from 11am and the sale kicks off at 1pm. The rams are performance tested through Stockscan and all the figures are available on the day or can be found on our website www.kismetstud.com.au/ramsale. Videos of each sale ram will be on Auctions Plus where you can also make bids - www.auctionsplus.com.au. We are fully accredited for Brucellosis and are MN1V in the MAP programme.

We put a lot of emphasis on the shape of the rams to minimise management and maximise live lambing percentages. Having smooth shoulders with a reasonable neck extension and not too big a head produces a live lamb without a stressful birth, while still being a good size lamb. This in turn means less assisting ewes with lambing, and less stress on the ewes resulting in a lot more live lambs. Our lambing percentages back this up as they are generally around 170-180% with no artificial interference.

We have added the Southdown/White Suffolk cross rams to our armoury for those people who like the quick maturing and slightly easier lambing facet of the Southdown characteristic. The rams look great and have grown out enormously and still have their lambs teeth.

All of our rams are grass fed only which assists greatly in their performance and longevity. Grain fed rams are often found to be very poor performers with very low fertility for the first mating.
